## Wildkamera

### Quick Start Guide

#### Overview

- |                                |                             |
|--------------------------------|-----------------------------|
| 1) Bottom Cover                | 2) SD-Card Slot             |
| 3) USB Connector               | 4) TV Out connector         |
| 5) PIR                         | 6) Infrared Flash           |
| 7) Lens                        | 8) 2 inch color LCD Display |
| 9) Sound recorder              | 10) Lock                    |
| 11) Power switch               | 12) Battery Depot           |
| 13) Portable remote controller |                             |

The camera has 3 basic operation modes:

1. OFF mode: Power switch is at OFF position.
2. ON mode: Power switch is at ON position.
3. TEST mode: Power switch is at TEST position.

In the above three modes, the OFF mode is the specified safe mode when replacing the SD-card or batteries and transporting the camera.

A. There are 3 modes under system setting for your selection.

a. Camera

It only takes photos at a time.

b. it only takes videos at a time.

c. Camera & Video.

It takes photo firstly, then takes videos at time.

B. There are also 2 ways to take photos or videos.

a. Manually by using the remote control

After sliding power switch to 'TEST', without any menu on the screen, press SHUTTER(OK) on the remote control to take photos or videos.

b. Automatically

After sliding power switch to ON, the LED blinks 15 seconds, then the camera takes photos or videos when the movement is detected.

C. To view the photos or videos on the camera, please turn off the camera, slide power switch to Test, press right arrow key on remote control to enter view model.

a. Photos

Press up or down on the remote control to view the previous or next photo.

b. Videos

Press left button on the remote control to start the video, press left button again to stop.

Note: Press OK to return to screen.

D. Please note, that this is not an error with the Camera:

Heavy rain, fog and drizzle (in the dark) will give white photos without motive.

Electric and electronic equipment contains materials, components and substances that can be hazardous to your health and the environment, if the waste material (discarded electric and electronic equipment) is not handled correctly.

Electric and electronic equipment is marked with the crossed out trash can symbol, seen below. This symbol signifies that electric and electronic equipment should not be disposed of with other household waste, but should be disposed of separately.

All cities have established collection points, where electric and electronic equipment can either be submitted free of charge at recycling stations and other collection sites, or be collected from the households. Additional information is available at the technical department of your city.
