

WELCOME

Congratulations on your new Hypervolt

You are one step closer to moving better,
feeling better, and being a better version of you.
The Hypervolt was created to keep you doing
what you love. Whether you're an elite athlete,
weekend warrior, or simply trying to get your
body to feel its best, the Hypervolt will help
you get there... and then some.

NEXT STEPS

Let's get started

- 1 Register your device at hyperice.com/register-product** to activate your warranty and ensure easy returns, repairs, or refunds.
- 2 Download the Hyperice App** to get the most out of the Hypervolt, or any Hyperice device.

- 3 Charge your device** by plugging in your new Hypervolt with the provided Hyperice charger. Fully charge the battery for up to six hours before first use.

Have questions? Call 1-855-734-7224, chat live at hyperice.com, or email customersupport@hyperice.com.

QUICK START GUIDE

Moving better, made simple

1

Power up

Switch your Hypervolt to the ON position at the base of the handle. Once your device is powered ON a blue light will illuminate, plus (up to) four green lights for battery level.

2

Activate pressure sensor

Activate the pressure sensor by pressing the speed setting button once. Wait five seconds as the white lights sequence and turn off.

Your Hypervolt is now ready for use.

3

Adjust speeds

Choose your desired speed (1-3) by pressing the speed setting button once per speed.

The blue lights above the speed setting button will indicate the current speed.

**4**

Changing attachments

Choose desired head attachment and insert directly into the shaft / opening while pushing firmly. **Fork attachment?** Align the "groove" on the fork with the recess on the shaft / opening and push firmly.

**5**

Recharging

Only use the provided Hyperice wall charger to uphold warranty. Full charge is indicated when the LED "band" on the handle stops flashing and becomes solid green.

**6**

Caring for your Hypervolt

Use a damp, clean, cloth and gently wipe your Hypervolt. Make sure the power is OFF and the battery charger is not attached. Store in a clean, cool place when not in use.

HEAD ATTACHMENTS

Choosing the best head attachment

HEAD ATTACHMENTS

Fork

Longer muscles such as calves, forearms, biceps, and ankle / Achilles area.

Bullet

Trigger points found in glutes, hips, traps, shoulders, and other complex muscle groups.

Flat

Larger surface areas such as quads, hamstrings, back, and chest.

Cushion

Sensitive areas such as wrists, ankles, knees, traps, and around the neck.

Ball

Sore muscles and a great starter attachment for larger muscle groups.
