Enjoy

You can play music synchronously on two connected earphones

FAQ

Playback is interrupted?

Normally, the working distance is 10m at a non-sheltered area. If the distance to the playing device is more than 10m the music playback will be interrupted

The earphone cannot connect to the phone paired before

If you can't connect, please delete the earphone from the Bluetooth device list in the phone, press the Function button for 2 seconds to enter Bluetooth pairing mode and then pair with the phone again

I have two phones, and want to connect both to Track+

If the earphone have been previously paired with the two phones, just select the earphone from the Bluetooth device list in the phone to connect

The earphone will automatically power off if no operation/playback is detected

By default, the earphone will automatically power off if no operation/playback is detected within 30 minutes to save power. This value can be changed via App

* Phone, tablet computer or any other device with Bluetooth are all applicable This User Manual takes phone as an example for operation instruction
